Invasively validated for	PWV (ao/cf)	✓
	Aix	✓
	SBPao	✓
Blood pressure measurement accuracy (BHS criteria)		A/A
Storage capacity (no. of measurements)		1 000

Abbreviations:

BHS – British Hypertension Society protocol. A/A is the highest achievable grade.

Summary:

The wide range of measured parameters, the clinical validation of the method and the unmatched storage capacity make the Arteriograph24 the market leader in the field of 24-hour arterial function monitoring.
